About us

Incorporated in 2009, Probiz is an emerging leader in providing systems integration and maintenance services in India. We are specialized in providing personalized, user-friendly, innovative and integrated solutions for your business in the field of fire & security, retail & office automation, IT Infrastructure and door tech engineering etc.

From fire detection and suppression to intrusion detection, access control and video surveillance we deliver products to meet the needs of customers in a variety of applications and settings.

BUSINESS VERTICALS: • Security Solutions • Fire Safety & Engineering Solutions • IT Infrastructure & Software Solutions • Door Engineering Solutions • Retail Automation Solutions • Office Automation Solutions

SERVICES: • Technology Consulting & Design (3D Modelling) Services • Project Execution • Warranty & AMC Services • Professional Services

Our highly-efficient and experienced team of employees are dedicated to support our customers through delivering on-time and on-budget solutions. Backed by our maintenance and service support team you can be assured that we would secure and protect your investment for a longer span of time.

We supply a comprehensive range of products for the demanding Indian market, each of them designed and tested for local and International standards and various weather conditions as well.

We constantly promote new products to meet our customer's ever-growing demand and with the help of our business partner's extensive research and development, test facilities and experienced design teams.

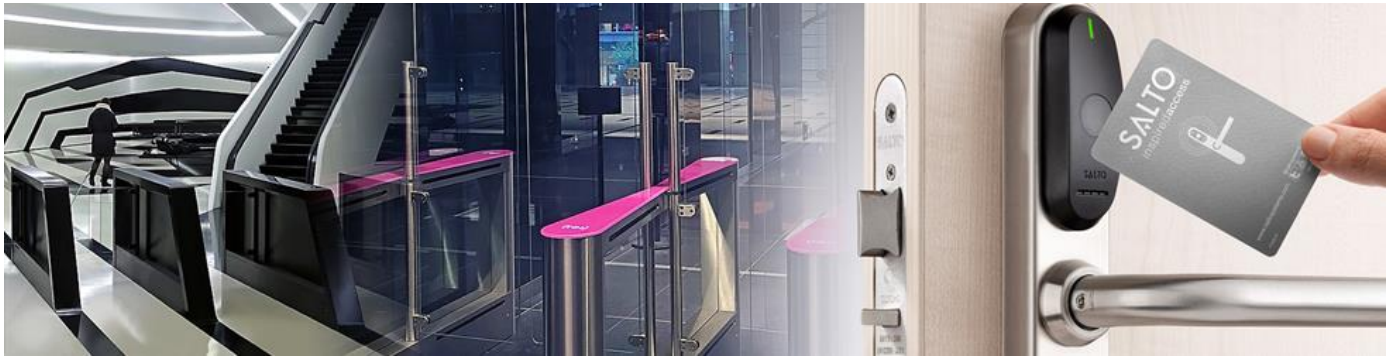

Get in touch with us today to protect and enhance your business.

Solutions

- Access Control
- Fire Engineering
- IP Video Surveillance
- Entrance Control
- HVAC, BMS and Energy Management
- Smart Home & Building Solutions
- AV Intercom
- Command & Control Center

ACCESS CONTROL SYSTEMS & SOLUTIONS:

From simple access control applications to enterprise-wide implementations, Probiz solutions Enable businesses to better manage their security and business infrastructures.

Our products are scalable and customizable open-architecture systems enable both remote (Internet) and on-site management of data security, premises security, ID management, alarm monitoring, physical asset management and digital surveillance video.

From small to mid-sized or global enterprises, ProBiz offers corporations powerful, reliable, easy-to-use systems with centralized control for a cohesive network solution.

With choices ranging from proximity and Wiegand to smart card and biometric, ProBiz offers a reader for any level of security required.

Our Access control Product Features and Benefits

- Multi-platform solutions
- Integrated ERP with security database.
- Multiple workstations
- Unlimited Scalability
- Complete seamless open integration with multiple applications
- Full-featured Photo ID badging
- Card holder information anytime and anywhere
- CCTV interfaces

- Open protocol and multi reader support
- Be it standalone or a fully integrated system, we have the answer. From a single door to a large-scale complex, we can provide the most up to date & cost effective solutions.

We represent SALTO, DDS, CARDAX, SOFTWARE HOUSE, KANTECH, BOSCH & LENEL Systems.

Open architecture maximizes your flexibility, enabling interoperability with industry-standard databases. We have access management solutions for the below applications.

- RFID based Vehicle Access.
- Visitor Management systems.
- Smart Card access systems.
- Time Management Solutions.
- Asset Management.
- Guard Tour Access.
- Elevator control.
- Intrusion Zones.
- Event & Alarm Management.

Video Surveillance:

Our enterprise IP and Analog security solution that provides seamless management of digital video, audio and data across any IP network. Its open and distributed architecture offers the freedom to design a system that truly matches your needs.

Our design provides the flexibility to grow your system one camera at a time, from one to thousands of cameras. Regardless of your system's complexity, the intuitive user interface ensures that security personnel can easily assess and respond effectively to events. Innovative failover and redundancy capabilities eliminate any single point of failure, making our products as the most reliable security solution available today.

Entrance Control:

ProBiz can provide a complete range of automation solutions for car parking, traffic control, pedestrian access and traffic management. With wide range of products and accessories from our leading suppliers, we can provide the most up to date & cost effective solutions for your all needs in this vehicle and pedestrian control.

- Automatic Barriers- Non Crash Rated
- Swing & Sliding Gate Automation Systems

- Parking & Parking Management systems
- Turnstiles & Flap Barriers
- Crash Rated Bollards
- Crash Rated Boom Barriers
- Crash Road Blockers

Our physical control equipment's are suitable for any environment; utilize proven designs, intelligent controllers with highest safety standards and the highest quality materials to provide ultra-reliable and rugged service, year in, year out.

FIRE PROTECTION ENGINEERING SOLUTIONS:

Probiz offers turnkey solutions of Fire Protection & Safety Works for industrial, commercial & residential market segments. As a leading organization, we are technology driven at our core with an overriding commitment to quality and our primary measure of success is customer's satisfaction.

A serious fire can have a devastating effect on an organization. Lives are placed at risk and physical property can take months to rebuild. For many companies, the business never fully recovers.

Probiz has been protecting lives, property and companies through comprehensive fire protection solutions - ranging from engineering advice and risk analysis to certification and fire training - across the commercial, industrial, private and public sectors.

We have been working closely with leading engineering consultants, architects and major users and additionally conducting seminars and educational programs to highlight the latest available technology and

solutions in the field. We believe in rendering Total Service & Solution to the customers in the field of Fire Protection and represent the leading organizations in market.

Probiz tailors fire protection solutions to address your specific needs, no matter what the size of your business. We are supremely flexible because we know those needs are as diverse as the businesses of every one of our customers.

Before installing a new fire protection system, we carefully analyze your needs and intended purpose. We meet the relevant personnel in your organization to become thoroughly acquainted with your requirements. Once your objectives have been discussed, prioritized and documented, our design team will develop an appropriate fire protection solution.

We offer a wide range of systems including:

- Fire Sprinkler
- Gaseous
- Water Spray Deluge
- Water Mist
- Foam
- Vehicle Fire Suppression
- Kitchen Fire Suppression

To simplify and streamline the process, we assign installation teams who will work with you from initial discussions through to testing of the finished product. No matter how big or small, complex or straightforward your installation requirements are, we are ready to meet them.

Our work is fully tested and is guaranteed with a full parts and installation warranty. And of course, all our solutions are designed to comply with all relevant Standards, codes, and legislative requirements, including environmental, health and safety.

Design

Before installing a new fire protection system, we will survey your facility and analyze the facility's composition and purpose. Once the specific requirements have been determined to suit the individual needs of the facility, our engineers will plan and deliver a fire protection solution tailor made for you.

In order to meet our customer's criteria, our team can design tailored solutions that draw on both their own knowledge and experience or extend to our resource base for the right solutions.

Install

Over the past 8 years, our specialized installation teams have delivered many successful fire protection solutions, including automatic sprinklers, heat detection and smoke alarms, emergency warning and

evacuation systems, deluge systems, water spray and mist systems, gas and foam suppression systems and more.

The Probiz Installations team is committed to meeting the individual needs of our clients through quality service and installations that's both innovative and best in class. We are proud to work in a variety of large and small, private and public sectors

Commission

After installation, Probiz can provide a performance report on your fire protection system. This includes testing the equipment and confirming that it is compliant with relevant Standards and legislation. We can also provide upgrades and enhancements for your existing systems if needed.

The Probiz Servicing teams are specialists in testing, maintaining and repairing fire protection systems after installation or during building refurbishment.

HVAC, BMS and Energy Management:

We are partnered with Trane, An Ingersoll Rand Company in India for Building Management Systems. The detailed features and benefits are explained below.

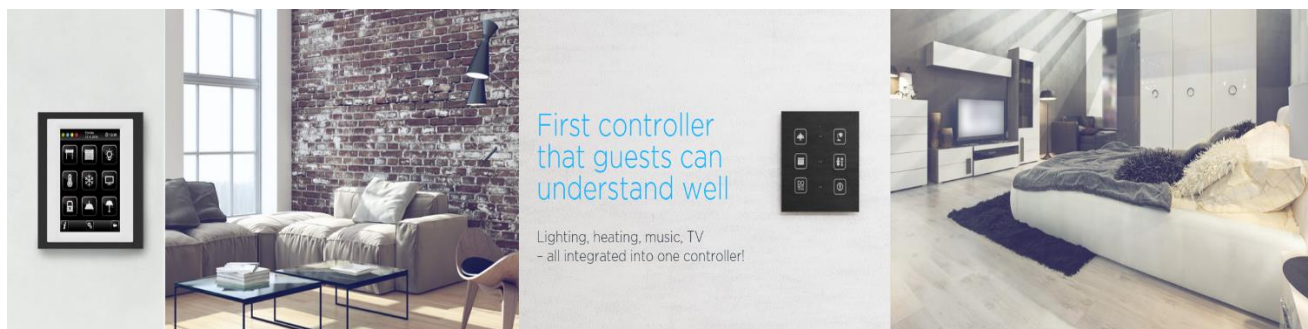

The Trane Company's line of building management systems includes a product for every control need, from a remedy for a problem area in an existing building to a comprehensive system for a major complex or campus. Trane building management system capabilities and features include:

- Scheduling for weekdays and holidays
- After-hours usage tracking
- Management reports and logs
- Dynamic and interactive color graphics
- Direct digital control and custom programming routines
- Comfort monitoring by zone

- Energy-saving software including chiller plant control, demand limiting, optimal start/stop, and night setback
- Operator interface that is easy to learn and use
- Architecturally compatible, ergonomic design Trane is unique in its ability to offer total Integrated Comfort systems, HVAC, controls, and building management from a single source. These systems constitute a vigorous response to today's demands from regulatory agencies, building designers, contractors, owners, and occupants. Pages two through nine in this catalog illustrate four typical Trane building management system applications. They demonstrate the versatility and integration capabilities of the various products in this catalog. Each Trane building management installation is designed specifically for the facility it manages and may be configured differently than the examples shown.

Smart Home & Building Solutions:

Smart home is for everyone - even or those with the already built home. We are partnered with iNELS RF which is wireless installation and can be expanded anytime you wish!

The Solution overview and Benefits for Home and Hospitality Industry are:

- **No Demolition:** The installation requires no structural alterations
- **Design:** Controllers are designed based on current design trends.
- **Flexibility:** The ability to move the wireless switch anywhere is a real advantage. Are you moving? Your installation goes with you.
- **Schedule :** Up to five adjustable time programs can be defined in a single day
- **Scenes:** With a single button/touch, it is possible to activate multiple commands at once according to the given situation or desire.
- **Expandable :** The system can easily be expanded to include new units and functions
- **Check in/check out:** Thanks to integration into a hotel system, it is possible to create a light scene in the room when a guest registers.
- **All Off/energy saver:** When the guest then leaves, the system automatically disconnects all electrical appliances and saves on both heating and cooling costs.

- Do Not Disturb: Guests can very easily signal if they want the room cleaned, or do not want to be disturbed
- Comfort: The combination of automatic illumination based on motion and central control of the room
- Versatility: The system is suitable for installing in large and small lodging facilities alike.

AV Intercom:

ProBiz can supply a range of Electronic systems used for some specific needs, such as

- Video/Audio Intercom systems from AIPHONE-Japan
- IP Audio Intercom and Paging Solution- AIPHONE -Japan & DIGITAL ACOUSTICS-USA
- PA systems-ATEIS-Netherlands, BOSCH & AHUJA

We have a wide range of solutions from simple hardwired intercom to IP based intercom systems. It is now possible to control the door or any physical control equipment's via our IP intercom solutions, anywhere in the IP network.

Our AV Intercom systems shall be used in schools, universities, Hospitals, institutions and businesses and can be integrated with digital networking platforms and fire and security systems for a comprehensive solution.

Command & Control Center

We represent world leading suppliers of command & control center applications which is best suitable and proven in the following industry segments:

1. Hospitality
2. Travel & Transportation
3. Oil & Gas
4. Retail & Distribution
5. Public Safety & Security
6. Financial Services
7. Industrial & manufacturing
8. Corporate Enterprise

IP Security Center PSIM integrates all sub systems such as CCTV, security, fire, access control and intruder systems to give you a command and control center, which can ensure compliance to the strictest security ensuring business continuity. As the information is brought to central location, it can also save costs by reducing the amount of personal required to monitor your facilities. Additionally, the open architecture of the IP security center allows integration with other business systems, creating further cost savings and new revenue streams.

Our Clients:

Our Partners

Offers systems that combine access control for HOSPITALITY & CORPORATE Environments.

Offers system that combines access control & alarm monitoring for any Industry Environments. One of the proven, excellent & preferred system for fortune 500 companies in the world.

Offers High-end access control & alarm management solutions.

Specialized in providing professional IP-based network cameras and video servers for security surveillance and remote monitoring.

Offers Building Management Solutions

Smart Homes & Buildings

Offers Highend access control & alarm management solutions.

Offers Highend access control & alarm management solutions.

Created single-card solutions that provide convenient, secure access and commercial exchange in both the physical and virtual world.

Offers HIGH QUALITY VIDEO Surveillance, Access Control & Intrusion Systems.

Offers AV Intercom Systems

Offers Fire Suppression Systems(NOVEC 1230 & FM200)

Offers Highend access control & alarm management solutions.

Offers systems that combine access control & alarm monitoring for any Industry Environments.

Offers HIGH QUALITY VIDEO Surveillance Systems.

Offers HIGH QUALITY VIDEO Surveillance Systems.

Offers advanced Anti-Terror & Entrance Control Manufacturer from Turkey

Offers Fire and Security Products
